## **I Education and Training**

1988-1990 Postdoctoral Fellow. University of Wisconsin - Madison - Laboratory of Genetics. Supervisor: Dr. William Engels.

1988 Ph.D, University of Western Ontario, Department of Biochemistry. Supervisor: Dr. George Chaconas. Dissertation: *Characterization of the Integrative Precursor Protein-DNA Complex of Bacteriophage Mu.*

1983 HBS, University of Western Ontario, Genetics

## **2 Employment**

**2019-present**, Chair-Department of Biochemistry

**2002-present**, Professor of Biochemistry  
University of Western Ontario, Faculty of Medicine  
now the Schulich School of Medicine and Dentistry

1997-2002, Associate Professor of Biochemistry  
University of Western Ontario, Faculty of Medicine

1993-1997, Assistant Professor of Biochemistry  
University of Western Ontario, Faculty of Medicine

1990-1992, Assistant Professor Medical Genetics  
Memorial University of Newfoundland, Faculty of Medicine

## **3 Faculty Development**

2018, Four day applied course on Resolving Microbial Communities At Strain-Level using Metagenomic Assembly, University of Exeter, UK

2014, Five day theory and applied course on Compositional Data Analysis (UdG, Spain)  
Accredited by European Statistical Society

2007, Leadership Workshop  
Offered by Continuing Education of Shulich School of Medicine and Dentistry for Medical School Accreditation Leaders

1995, Course on Teaching at the University Level  
Offered through the Faculty of Medicine Development Office.

1990, Faculty Orientation Day Memorial University of Newfoundland  
This covered teaching tips and grant writing skills for new faculty at MUN

## **4 Awards, Honours, Fellowships**

2014, Faculty Development Award: Attended week-long course on Compositional Data Analysis (UdG, Spain)

2011-2013, Faculty Scholar

2016-17, University Student's Council Teaching Honor Roll

2011-12, University Student's Council Teaching Honor Roll

2010-11, University Student's Council Teaching Honor Roll  
2009-10, University Student's Council Teaching Honor Roll  
2007, University Student's Council Teaching Honor Roll  
2005, Schulich School of Medicine Teaching Award  
2004, WL Magee Teaching Award, Biochemistry, UWO  
1993 - 1998, Salary Award, Medical Research Council of Canada (MRC)  
Development Grant in Molecular Biology  
1984 -1988, K. M. Hunter Fellowship, National Cancer Institute of Canada.  
1983, Graduate Entrance Scholarship, UWO.

## 5 Expertise and Research Interests

Composition and function of the human and other microbiomes. I use and develop tools to examine 16S rRNA gene composition, gene expression of mixed population samples, and metabolomic analysis of clinical samples. I teach a graduate course on the use of compositional data analysis techniques to examine transcriptomes, microbiomes and other types of complex data sets derived from high throughput sequencing.

Protein evolution. We use and develop tools to examine how protein structure and function is maintained in response to sequences changes. We have a special interest in identifying the role that variable positions play in protein evolution. I teach an undergraduate course in protein sequence alignment and proteins sequence-structure alignment.

Computational biology and that application of techniques for compositional data analysis to the above problems. Our primary contributions so far have been the ALDEx2 tool in Bioconductor for the analysis of high throughput experiments that generate counts per sequence tag: 16S rRNA gene sequencing, transcriptomics and selex-type experiments. I have further tools under development, and have contributed new visualization methods (effect-size plots) to the field.

## 6 Scholarly and Professional Activities

### 6.1 Scholarly Presentations and Invitations

2022, Invited speaker, CoDaWork 2022, Toulouse, France  
2021, Presentation, CM Statistics (Zoom presentation)  
2021, Invited speaker, National Eye Institute Workshop on the Microbiome, (Zoom presentation)  
2020, Invited speaker, Genentech (Zoom presentation)  
2020, Invited speaker and organiser, ISAPP Annual Meeting  
2019, Invited workshop speaker, Computational and Methodological Statistics 2019, London, England  
2019, Invited Participant/Speaker, Emerging Challenges in Microbiome Data Analysis, BIRS, Banff, Canada  
2019, Invited Speaker, Barcelona Microbiome Debates, Barcelona, Spain  
2019, Invited Speaker, Department of Bioinformatics, North Carolina State University, Charlotte  
2019, Invited Speaker, Department of Biology, North Carolina State University,

2019, Invited Speaker, Program in Bioinformatics, Duke University,

2019, Invited Webinar Presenter, International Society for the Application of Probiotics and Probiotics (ISAPP)

2019, Invited Speaker, North American Microbiome Congress, Washington, USA

2018, Invited Webinar Presenter, International Life Sciences Institute (ILSI)

2018, Invited industrial speaker (KGK Biosciences), Supply Side West, Las Vegas, USA

2018, Invited speaker, Department of Physiology and Pharmacology, UWO

2018, Invited speaker, Department of Epidemiology, SUNY Buffalo, USA

2018, Invited speaker, EMBL-EBI, EBI Seminar Series, Hinxton, Cambridgeshire, UK

2018, Invited speaker, Gairdner Foundation Symposium on health through food and microbes, London, CA

2018, Invited speaker Gynecological Research Symposium, The Society of Gynecologic Oncology of Canada, Toronto, CA

2018, Workshop organizer and presenter, Compositional Data analysis methods, NGS'18, Barcelona, Catalonia

2017, Keynote, Microbial Ecology 2017, Toronto, Ontario

2017, Workshop, Compositional Data analysis methods, Microbial Ecology 2017, Toronto, CA

2017, Invited speaker, EMBL-EBI Industrial Program Workshop - The human microbiome: challenges and opportunities for novel therapeutics, Hinxton, England

2017, Invited speaker Canadian Society of Microbiology, Waterloo, Ontario

2017, Canadian Statistical Sciences Institute Microbiome Planning Meeting speaker and discussion leader, Winnipeg, Manitoba

2017, Contributed Oral Presentation (2), Great Lakes Bioinformatics, Chicago, Illinois

2017, Invited speaker in the Microbiology & Immunology Department, Western University, London, CA

2017, Invited speaker in the Health Sciences Department, Carleton University, Ottawa, CA

2016, Invited speaker in the Biostatistics and Epidemiology Department, Western University, London, CA

2016, Invited speaker at Exploring Human Host-Microbiome Interactions in Health and Disease 2016, Cambridge, UK

2016, Invited workshop organizer at Exploring Human Host-Microbiome Interactions in Health and Disease 2016, Cambridge, UK

2016, Invited speaker at Symposium on Synthetic Biology, Western University, London, CA

2016, Invited workshop presenter, The Human Microbiome and Epidemiology, 2016 Epidemiology Congress of the Americas, Miami, USA

2016, Invited presentation/workshop, Infection, Inflammation and Immunity course, The Arctic University of Norway, Tromsø, NO

2016, Oral Presentation, Great Lakes Bioinformatics/Canadian Computational Biology Conference, Toronto, CA

2015, Invited visiting scholar, Tiyan Health Sciences Research Institute, Zenjiang, China

2015, Invited speaker at Exploring Human Host-Microbiome Interactions in Health and Disease 2015, Cambridge, UK

2015, Invited paper at CoDaWork 2015, Girona, Spain

2015, Applying compositional data framework to microbiome datasets, Canadian Society of Microbiology workshop 2015, Saskatoon, Canada

2015, Invited speaker, University of Guelph Bioinformatics group

2014, Invited seminar, Dept. of Biochemistry, University of Calgary

2014, Invited participant at NIH sponsored Microbiome Quality Control Initiative: only Canadian group invited, Rockville, MD, USA

2013, Invited speaker at Fondation Merieux Conference on Better Foods for Better Health, Annecy, France

2013, Invited speaker at the Institute of Genome Sciences seminar series, University of Maryland, Baltimore, USA

2013, Invited expert participant at African International Conference and Workshop on the Microbiome and Probiotics, Nairobi, Kenya

2011, Invited speaker at the RePOOPulating the gut: therapeutic microbial preparations to eradicate recurrent *C.difficile* infections in Canada, Toronto

2011, Invited expert participant at International Society for the Application of Probiotics and Prebiotics, Berkley, CA

2010, Invited platform speaker at the Ontario Illumina Users Group, Toronto Ontario

2008, Invited speaker at University of North Carolina-Charlotte Department of Bioinformatics Seminar Series

2003, Invited speaker at First Canadian Workshop on Statistical Genomics, The Fields Institute, Toronto

2000, Department of Genetics seminar series, Harvard Medical School, Boston, Mass.

1999, London and Regional Cancer Center seminar series, London Ontario

1997 Department of Molecular Biology and Genetics seminar series, University of Guelph

1994 Mogenson Research Forum, UWO Faculty of Medicine

1992 Department of Genetics, University of Alberta seminar series  
Alberta Heritage Foundation for Medical Research Sponsored Speaker

1992 Lunchtime Seminar Series, Faculty of Medicine, Memorial University of Newfoundland

1992 Department of Biochemistry seminar series, Queens University

1992 Department of Biochemistry seminar series, UWO

1991 Janeway Hospital Residents Training seminar series, Faculty of Medicine, MUN

1991 Molecular Biology Research Discussion Group seminar series, Faculty of Medicine, MUN

1991 Department of Biochemistry seminar series, MUN

1990 Faculty of Medicine seminar series, MUN

## 6.2 Media Interviews and Public Presentations

## 6.8 Research Funding History

**NSERC Alliance Grant, 2022-2024:** Rapid scaling of viral spike protein production for SARS-CoV-2 testing using *Phaeodactylum tricornutum*

PI: Edgell DR, Co-PI Gloor GB, Karas B. Suncor

total: \$800000

**Mitacs Accelerate, 2020:** Rapid scaling of viral spike protein production for SARS-CoV-2 testing using *Phaeodactylum tricornutum*

PI: Gloor GB, Co-PI Edgell DR, Partner organization: Suncor

total: \$40000

**NSERC Alliance Grant 2020-2024:** Development and validation of rapid point of care food safety assays for Salmonella and Campylobacter - Rapid detection facilitated by CRISPR

PI: Rieder, M, Co-applicants Gloor, GB, Edgell, DR and Karas, B. Industrial Partner is International Point of Care Ray, D and Styba, G.

total: \$730999 + 1:1 matching from IPOC

**Weston Family Microbiome Initiative 2020-2022:** A Jekyll and Hyde role for gut bacterial proteases in the regulation of pain

Co-PI: Lomax, AEG, Reed, DE, Co-applicants Gloor, GB, Vanner, SJ, Allen-Vercoe E, Reed, DE, Ross, AC, Sheth, P, Bercik, P, De Palma, G

Applied research into the microbial causes of pain in IBD patients. Gloor role is metagenomic and metatranscriptomic profiling of patient microbiome samples.

total: \$3213000

**CIHR Project Grant 2019-2022:** Metabolic and Metagenomic effects of repopulation of the intestinal microbiome in patients with severe unexplained atherosclerosis (extended due to covid-19)

PI: Spence, DJ, Co-applicants Azarpazhooh, Mahmoud Reza; Burton, Jeremy P; Gloor, Gregory B; Silverman, Michael; Urquhart, Bradley L

Clinical trial to determine the effect of stool transplant on progression of atherosclerosis in patients predisposed coronary artery disease. Gloor role is metagenomic and metatranscriptomic profiling of patient microbiome samples.

total: \$200000

**CIHR Project Grant, 2019-2024:** Modulation of pain in IBD by microbial proteases

PI: Lomax, AEG, Co-PI Gloor, GB, Allen-Vercoe E, Reed, DE, Ross, AC, Vanner, SJ

Basic research into the microbial causes of pain in IBD patients. Gloor role is metagenomic and metatranscriptomic profiling of patient microbiome samples.

total: \$395990

**CIHR Project Grant, 2018-2023:** ConCRISPR: Conjugative delivery of a hybrid CRISPR/ Cas9 nuclease system for specific microbiota modulation in the mammalian gut

*PI: Edgell, DE, Co-PI Gloor, GB Heinrichs, D and Karas B*

Basic research into the technology platform to target and eradicate specific taxa or genetic components of the human gut microbiome.

total: \$891000

**Weston Family Foundation Microbiome Initiative, 2017-2018:** Microbiota modulation with a hybrid CRISPR nuclease

*PI: Gloor, GB, Co-PI Edgell, DE and Karas B*

Developing technology to target and eradicate specific taxa or genetic components of the human gut microbiome.

total: \$149000

**NSERC Discovery, 2015-2020:** Molecular covariation in protein families

*PI: Gloor, GB*

Goal is to examine how covarying positions affect the structure and function of protein families that can be used as gene editing reagents.

total: \$155000 - pays for student and supplies

**NIH R21 Dec 2015-2017, NIH R33 2017-2018:** Microbes that matter

*PI: Elaine Petrof (Queen's U), Allen-Vercoe (Guelph), Gloor (UWO)*

Developing a synthetic stool substitute for the treatment of recurrent *C. difficile* infection

direct to Gloor: \$70000 - partially pays for one student and sequencing costs

**CIHR 2013-2016:** Role of intestinal microbiota in non-alcoholic fatty liver disease pre and post bariatric surgery

*PI: ALLARD, Johane P (U. Toronto): , Comelli Elena M; GLOOR, Gregory B; JACKSON, Timothy D; LOU, Wen-Yi W; OKRAINEC, Allan*

Characterization of the stool microbiota in a cohort of patients undergoing treatment for non-alcoholic fatty liver disease

total: 522169, direct to Gloor: \$25000/yr - partially paid for one student and sequencing costs

**CIHR 2014-2016:** Intestinal microbiome and extremes of atherosclerosis

*PI: SPENCE, J. David , ALLEN-VERCOE, Emma; GLOOR, Gregory B; REID, Gregor*

Characterization of the stool microbiota in a cohort of patients screened for risk of atherosclerosis

total: 211600, direct to Gloor: \$25000 - partially paid for one student and sequencing costs

**CIHR 2013-2016:** Non-Alcoholic Fatty Liver Disease: Role of Intestinal Microbiota and n-3 Polyunsaturated Fatty Acid Supplementation

*PI: ALLARD, Johane P , COMELLI, Elena M; GLOOR, Gregory B; LOU, Wen-Yi W*

Characterization of the stool microbiota in a cohort of patients treated for non-alcoholic fatty liver disease with fish oils

total 211600, direct to Gloor: \$17000 - partially paid for one student

**CIHR Team grant, 2010-2015:** The Vaginal Microbiome Project Team

*PI:* MONEY, Deborah M, BOCKING, Alan D; HEMMINGSEN, Sean M; HILL, Janet E; REID, Gregor (Co-PIs), co-investigators: DUMONCEAUX, Timothy J; GLOOR, Gregory B; LINKS, Matthew G; O'DOHERTY, Kieran C; TANG, Patrick K; VAN SCHALKWYK, Julianne E; YUDIN, Mark H

Collection and analysis of large vaginal microbiota cohorts to identify determinants of health and disease in the Canadian population

total:1745341, direct to Gloor: 15000/year - partially paid for one student. My role was tool development

**Southeastern Ontario Academic Medical Organization 2014-2015:** Elucidating the factors that determine success in fecal transplant therapy for *C. difficile* infection

*PI: PETROF, E, ROPELSKI, Mark, ALLEN-VERCOE, Emma, GLOOR, Gregory*

Identifying mechanisms of microbial ecosystem inhibition of *C. difficile*

total:92000, direct to Gloor: %14000 - paid for sequencing costs

**CIHR Network grant 2012-2015** Maternal-Infant Microbiome and Immunity (MIMI) Network

*PI: KOLLMANN, Tobias R, GLOOR, Gregory B; REID, Gregor*

Team grant to further training and planning of microbiome effects on proper health and development in Africa.

total:600000, direct to Gloor: 200000 - paid for PDF, student and conference costs

**NSERC ENGAGE, 2014-2015:** Function of maize endophytic microbiome

*PI: GLOOR, GREGORY* with A&L Biologicals

Total: \$25000 - sequencing and sample processing costs

Determine the functional differences between high and normal yield sites by examining the endophytic corn sap meta-transcriptome.

**Ontario Centre of Excellence, 2014-2015:** Meta-transcriptome of high-yield corn endophytic microbiome

*PI: GLOOR, GREGORY*, with A&L Biologicals

Determine the functional differences between high and normal yield sites by examining the endophytic corn sap meta-transcriptome.

Total: \$25000 - sequencing and sample processing costs

**CIHR Team grant in Bariatric Care, 2014-2019:** Exploiting the therapeutic effects of the fecal microbiome in bariatric care

*PI: ALLARD, Johane P, GAISANO, Herbert Y, BANKS, Kate; COMELLI, Elena M; GLOOR, Gregory B; HOTA, Susy S; JACKSON, Timothy D; LOU, Wen- Yi W; OKRAINEC, Allan; PHILPOTT, Dana J; POUTANEN, Susan M*

Fecal microbiome transplant as a treatment for obesity

direct to Gloor: \$0 - I have chosen to withdraw from this research team

**Agriculture and Agrifoods Canada, Agricultural Innovation Program, 2015-2017:** Developing molecular methods as diagnostic tools to identify biological factors contributing to crop productivity and soil health

*PI: Dr. George Lazarovitz (A&L Biologicals), Gloor, Gregory*

Monitoring and understanding corn endophytic communities to maximize crop yield

Total: \$600000, direct to Gloor: \$120000 - pays for one PDF and sequencing costs

**Academic Development Fund UWO, 2012:** Major request for Illumina MiSeq Instrument

*PI: Gloor, Hegele, Edgell, Singh*

ADF money to buy an Illumina MiSeq for the Robarts sequencing core facility

Total: \$132500 - Paid for purchase and installation.

**Ontario Genomics Institute Summer Research, 2010:** Metagenomic error rate analysis of rare biomes

*PI: Gloor*

Summer research project examining metagenomic sequencing error rates

Total: \$5000 - partially paid for one summer student

**NSERC Discovery, 2010-2015:** Molecular covariation in protein families

*PI: Gloor*

Total: \$255564 - Core Research Funding

**Academic Development fund, UWO, 2010:** Deep resequencing of single genes

*PI: Gloor*

Developing methodologies for resequencing on the Illumina MiSeq Sequencing Platform

direct to Gloor: \$7500 - partially pays for one student and sequencing costs

**CIHR Operating, 2006-2010:** MODULATORS OF DOUBLE-STRAND BREAK REPAIR IN DROSOPHILA

*PI: Gloor*

Core research funding for examining DSB repair in Drosophila somatic cells

Total: \$405312 - Core Lab Research funding

**Academic Development Fund, UWO, 2008:** IDENTIFYING AND VALIDATING COEVOLVING POSITIONS

*PI: Gloor, Wahl, Dunn*

direct to Gloor: \$8500 - partially paid for one PDF

**CANCER RESEARCH SOCIETY, 1997-1999:** GENES INVOLVED IN SOMATIC-CELL DOUBLE-STRAND REPAIR

*PI: Gloor*

Core research lab funding

Total: \$85145 - partially pays for one student and sequencing costs

**CIHR Operating, 2005-2008:** MODULATORS OF DOUBLE-STRAND BREAK REPAIR IN DROSOPHILA

*PI: Gloor*

Core research lab funding

Total: \$361580 - partially pays for one student and sequencing costs

**CIHR Operating, 2000-2006:** Double strand break repair in Drosophila somatic and germline cells

*PI: Gloor*

Core research lab funding

Total: \$148000 - Core Lab research funding

**MRC of Canada, 1997-2000:** TEMPLATE-DEPENDENT REPAIR OF DOUBLE STRAND CHROMOSOME BREAKS IN *Drosophila*

*PI: Gloor*

Total: \$105005 - Core Lab research funding

**MRC of Canada, 1993-1998:** Transposon induced gene targeting

*PI: Gloor*

direct to Gloor: \$156920 - Core Lab research funding

**Cancer Research Society, 1992-1994:** Gene targeting to arbitrary sites in the genome

*PI: Gloor*

Total: \$96000 - Core Research Lab Funding

**Where, years:** Title

*PI: , co-apps*

Total: \$70000 - Core Research Lab Funding

**MRC of Canada, 1991-1994:** P element regulation and double strand break repair in *Drosophila*

*PI: Gloor*

Total: \$197806 - Core Research Lab Funding

## 7 Teaching and Training

### 7.1 Course-based teaching

Figure 1: Teaching Ratings by Year and Course

I have been involved in teaching all or major portions of seven courses at Western, in addition to the occasional guest lecture. The six main courses are:

**MS138:** (1993-2003) First year medical school introduction to biochemistry. I taught 8-10 lectures that covered nucleotide metabolism, DNA replication and DNA repair as it related to cancer and HIV to first year medical students. I developed the material for delivery, following the broad theme given by the course co-ordinator at the time. The introductory didactic was removed from the undergraduate medical curriculum, along with most basic science, and replaced with small group teaching following a review of the undergraduate medical curriculum. I co-led a basic science review group for this process. I participated in small group teaching for several years afterward, but no evaluations were performed.

**BC410:** (1996-1999) I taught  $\frac{1}{3}$  of this course, focussing on the basics of molecular biology pertaining to DNA structure, repair and recombination. The primary teaching tool was discussion of papers of current research interest with the objective of teaching the scientific discovery process. Included in this was one year of Biochemistry 453, the same course, different number.

**BC445:** (2000-2014) I developed and taught this course from scratch, often 2-3x per year. The course broadly covered 'bioinformatics' and had a focus on sequence and structure alignment, and at the time of development was rather novel being the first of its kind outside of a computer science department to cover the theory and practice of sequence alignment. The philosophy of the of this course was to teach how sequence alignment algorithms work in an intuitive way. The students would learn how the algorithm worked by doing it by hand, then we would move on to applying computers to make it faster. In addition, students learned the basics of Perl or Awk scripting and how to use a UN\*X interface on a computer. Much of this material was rolled into BC3390.

**BC3390:** (2015 - now) A continuation, and simplification of the material in BC445 mandated when the undergraduate Biochemistry department curriculum was revamped.

**BUS629:** (2003-2006) I developed and taught this course in the Ivey MBA Biotechnology stream. I was responsible for all the material and for arranging guest experts. The thrust of the course was to teach non-science students in the MBA program how to quickly evaluate the business case for a biotechnology company based on the underlying science. This course was case-based and we discussed one case per week. I wish that Theranos was active at the time — it would have been a great example of foolish money chasing bad science. I received a citation from the Ivey Dean for teaching excellence.

**BC9545:** (2000 - now) This course initially was a more advance presentation of BC445 for graduate students. Since taking the course on compositional data analysis in 2014, I have redesigned it to be a course on the theory and practice of analyzing high throughput sequencing datasets — transcriptomics and metagenomics. I teach the theory and practice of probabilistic compositional data analysis for such datasets alongside the more traditional methods. My focus is on getting the students to understand and recognize when and why traditional methods go off the rails, and how they can use probabilistic compositional data analysis to double check their results.

The seventh course was a graduate computer science course.

**CS881:** (1996 - 2001) “Topics in computing and biology” Graduate Course. Six hours of lectures on the basics of DNA and on manipulations of DNA that could be used for primitive computational operations.

## 7.2 Summary of HQP

Graduate Students : 15; Undergraduate Student: 30; Postdoctoral Fellow: 2;

PhD Thesis Defence Examiner: 37

MSc Thesis Defence Examiner: 44

Thesis qualifying examiner: 48.

## 7.3 Graduate Students Supervised

Year	Student	Role	Description
2018-IPR	Joris	MSc (BC)	Defining correlated features in microbiomes
2017-IPR	Giguere	PhD (BC)	Integrative 'omic analysis of microbiomes
2017	Giguere	MSc (BC)	Visual exploration of multivariate multi-omic datasets
2017	Gajudhur	MSc (BC)	Visual exploration of multivariate multi-omic datasets
2013-2018	Macklaim	PDF	Microbial community composition of environmental datasets
2013-2016	Wong	MSc (BC)	Microbial community composition of patient cohorts
2012-2013	DiBella	MSc (MI, co)	Role of antisense transcription in bacterial gene regulation
2011-2017	McMurrough	PhD (BC, co)	Coevolution in LAGLIDAG endonucleases
2008-2013	Macklaim	PhD (BC)	Meta-omics of the vaginal microbiome
2008-2013	Dickson	PhD (BC)	Coevolution in protein families
2007-2012	Fernandes	PDF	Statistical tools for microbiome analysis
2002-2004	Gao	MSc (BCE, co)	Cell Surface Expression of <i>Vitreoscilla</i> Hemoglobin
2001-2008	Weedmark	PhD (BC)	DNA repair in <i>Drosophila</i>
1998-2005	Coveny	PhD (BC)	Polycomb genes and DSB
1997-1999	Ding	MSc (BCE, co)	Membrane display of an INP fusion protein
1994-1998	Dray	PhD (BC)	Targeting heterologous sequences in <i>Drosophila melanogaster</i>
1993-1998	Keeler	PhD (BC)	element induced double-strand break repair
1993-1995	Raynor	MSc (BC)	P element excision-induced double strand gap repair
1991-1995	Andrews	MSc (BC)	KP leucine zipper in the regulation of P transposition

## 8 Service to the University and Broader Community

### 8.1 University Committees

Year	Role	Description
2016	Member	Western NSERC Science Review Board
2012	Member	Law Graduate Program Review Committee
2011-2014	Member	Computer Science Promotion and Tenure Committee
2011-2013	Member	SUPR-G Committee
2011	Member	Faculty of Law and Ivey Business School Joint Promotion and Tenure Committee
2005-2006	Member	Ivey Business School Promotion and Tenure Committee
2005	Reviewer	External reviewer for Developmental Biology Graduate Program
2001-2004	Member	Promotion and Tenure - Biology Department
2001-2002	Member	UWO Bioinformatics Tier 2 CRC Search Committee
2000-2002	Member	Senate Subcommittee on Computing and Network Security
2000-2003	Chair	Senate Subcommittee on the WWW (SUWWW)
2000-2001	Member	Accessibility Subcommittee of SUWWW
1999-2000	Member	Biochemical Engineering Chair Selection Committee
1998-1999	Member	Senate Subcommittee on Computing and Network Services
1998-1999	Member	Senate Subcommittee on Computing and Information Technology
1997-1999	Member	Scientific Computing Research Advisory Subcommittee
1996-2000	Member	UWO Homepage Design and Implementation Subcommittee of SUWWW
1996-2000	Member	Senate Subcommittee on the WWW (SUWWW)
1995-2001	Chair	Molecular Biology Interfaculty Program Steering Committee
1995-2001	Chair	Molecular Biology Interfaculty Program Course Committee
1994	Co-Chair	Molecular Biology Interfaculty Program Open House
1993	Member	National Scholarship Selection Committee

### 8.2 Faculty Committees

Year	Role	Description
2010-2013	Member	Microbiology & Immunology Promotion and Tenure Committee
2007-2008	Member	Epidemiology and Biostatistics Chair Selection Committee
2007	Member	Ad hoc Faculty member disciplinary committee
2005-2007	Chair	Information Resources Institutional Self Study Task Force
2004-2006	Member	Promotion and Tenure - Pharmacology and Physiology Department
2001-2003	Member	Human Molecular Genetics Selection Committee
1999-2000	Chair	Information Resources Institutional Self Study Task Force
1997-2001	Member	UMEC Appeals Committee
1996-1998	Member	Medical Science Building Study Group
1996-1999	Member	Molecular Genetics Task Force
1996-1999	Co-Chair	Life Sciences group for the Medical School Curriculum renewal process
1996-2001	Member	ACMC Medical Informatics Group
1995-1996	Member	Computer and WWW Task Force
1994-2001	Member	Dean's advisory Committee on Genetics

### 8.3 Department Committees

Year	Role	Description
2019-present	Chair	Department of Biochemistry
2015-2017	Member (Seconded)	Biochemistry Promotion and Tenure Committee
2012-2015	Member	Research Committee
2010-2013	Member	Undergraduate Committee
2009-2012	Member	Biochemistry Promotion and Tenure Committee
2009-2012	Member	Appointments Committee
2004-2008	Chair	Biochemistry Graduate Studies
2002-2004	Member	Biochemistry Graduate Studies
2001-2004	Chair	Visiting Speakers Committee
1998-2004	CoChair	Department Outreach Committee
1997	Member	Biochemistry Promotion and Tenure Committee
1996	Chair	Nominating Committee
1995-2005	Member	Ad hoc Computing Advisory Committee
1995-1998	Member	Area, Safety, Equipment and Animal Care Committee
1993-1996	Member	Nominating Committee
1993-1996	Member	Graduate Studies Committee

#### 8.4 Board memberships

2001-2002, Member, Board of Directors for Partners in Research

1995-2001 Member, Board of Directors, The Foundation for Gene and Cell Therapy (FFGCT).

I was the lead negotiator for the FFGCT in working out a partnership with the MRC to fund up to 9 post-doctoral fellows in the area of gene therapy. This partnership provided approximately \$900,000 in new money to the MRC.

1995, Member of the Home Team for Jesse's Journey (Internet and Science Advisor).

I posted and updated a World Wide Web map page so that people from around the world could follow John and Jesse's progress.

#### 8.5 Grants and Awards Panels, Editorial membership, External Committees

2021-Present, Consulting Editor, Microbiome

2020, external reviewer, Fonds de la Recherche Scientifique - FNRS (Belgium)

2020, external reviewer, European Science Foundation

2019-2021, Member CodaWorks Student Grants Committee

2019-2021, Member, CodaWorks Meetings Committee

2019-now, Associate Editor, Nucleic Acids Bioinformatics and Genomics

2018-2021, Associate Editor, Microbiome

2018-2020, external reviewer Swiss National Research Agency

2016-present, Chair, CIHR Project Grant Scheme (GMX committee)

2016, Member, Agence Nationale de la Recherche, Preindustrial Biotechnology Demonstrator, Paris, France

2017-present, Member, CIHR College of Reviewers (First round invitee)

2017, Member, Canadian Crohns and Colitis Review panel

2016-2018, Section Editor, Microbiome  
2016, Western Science and Engineering Review Board Member  
2016-present CIHR Operating Grant Review Panel Chair  
2015-2016, Associate Editor, Microbiome  
2015, Ontario Genomics Institute: Large Scale Applied Research Program review panel  
2014-present, CRC College of Reviewers  
2012-2015, Editorial Board member Microbiome  
2010-2014, Member CIHR Genetics panel  
2008-present, IODE Doctoral Scholarship committee  
2006-2010, NCIC Model Organisms Panel B2  
1998, 1999, 2000, 2003, 2004, 2005, 2006, 2007, 2008 MRC / CIHR BMB / Genetics / Genomics invitee  
1999, Chair OGS Biochemistry / Biophysics panel  
item 1997-1999, OGS Biochemistry / Biophysics panel  
1997-2000, NCIC Virology and Molecular Biology Committee  
Panel F  
1995-2001, Foundation for Gene and Cell Therapy (Jesse's Journey)  
Chair and Review Organizer 1995 - 2001
